

The background of the entire image is a perspective view of a road or tunnel that recedes into the distance. The walls of the tunnel are covered in a dense, repeating pattern of small, light blue data points, including numbers, percentages, and symbols, creating a sense of depth and data flow. The road surface is a dark grey, and a bright orange line runs along the edge of the road, curving into the distance. The overall color palette is dominated by light blues and greys, with a touch of orange and green from the logo.

VTEC FLEETIQ

fleet performance partners

Transforming Fleet Data
Into Business Results

FLEETiQ, is a Vtec Solutions initiative to help fleet owners across the UK.

FLEETiQ is all about developing a close working partnership with fleet owners to transform fleet data into business results.

Vtec is the UK's leading provider of TomTom Telematics. We work with some of the best fleets in the country. We have seen the huge role that telematics can play in improving fleet productivity. However, the reality is many businesses become frustrated that the potential is not being reached. The day to day, gets in the way and plans aren't put in place to manage the big wins going forward.

Working in partnership with a FLEETiQ Fleet Performance Expert, there are many areas that can be addressed. Such as: Risk & Compliance, Fuel Consumption, Fleet Utilisation, Route Optimisation, Health and Safety, Vehicle Maintenance and Driver Behaviour.

We work **WITH** you to create a roadmap to successfully **measure, manage and improve** your fleet performance.

FLEETiQ at a glance...

Fleet Data Analytics

- Vehicle Performance Statistics
- MPG's
- Optimisation
- Driver Behaviour
- Reduce Co2 emissions

Fleet Performance Improvement Process

- Establish Baseline Performance Figures
- Measure Baselines vs. Performance
- Achieve Lower Insurance Premiums
- Achieve an Insurance Low Claims Bonus
- GAP Analysis for Risk Management

Project Management

- Create a Fleet Focus Team
- Establish Key Objectives for the Fleet
- Co-create an Action Plan for Improvement
- Utilise Fleet Intel Web Tool to manage performance

Driver Tool Box

- Driving Policy Statement
- Driver Handbook
- Telematics Policy
- Tool Box Talks
- Vehicle Checks
- Driver Risk Assessment

FLEETiQ Driver Register

- Medical Records
- Driving Performance
- Driver Risk Assessments
- Appraisals
- Licence Checks
- Maintenance Schedules

Fleet Strategy Architecture

- Digital Workflow Solutions
- Route Optimisation Software
- Utilisation of existing fleet
- Fuel Card Integration
- Vehicle Purchasing Strategy
- Insurance Strategy

The Outcomes

- Roadmap for future development
- Health & Safety Process Automation
- Effectively Managed Risk
- Structured implementation of Fleet Innovation & Productivity
- Insurance Claim reduction
- Increased employee involvement through Driver engagement

**With FLEETiQ,
we saw idling in
our yard reduce
to ZERO** ””

Karen Woodall/Operations Manager
Burns Express

“

**With FLEETiQ,
we saw a 40% saving
on our fuel bill**

”

Jim Hendry / Managing Director / GEMS Engineering
